**Portland Business Alliance Homeless Policy Survey**

October 29–November 1, 2022; n=400

**HOW TO READ CROSSTABLES**

Q1. All in all, do you think things are headed in the right direction or are things pretty much on the wrong track?

	Total	Gender	
		Male	Female
Total	1371 100%	599 100% (B)	772 100% (C)
Right direction	943 69%	394 66%	549B 71%
Wrong track	236 17%	126C 21%	100 14%
Don't know	192 14%	79 13%	113 15%

(sig=.05) (all\_pairs) columns tested BC

**How to Read Crosstables:** In the example chart (left), rows represent the three possible response options to the question “All in all, do you think things are headed in the right direction, or are things pretty much on the wrong track?” The three response options are: “right direction,” “wrong track,” and “don’t know.” The amounts in each response category sum to the amount in the “total” row at the top of the table.

The first column, or banner, is the “Total” column. It reflects the overall results.

The next two columns reflect the results of a subgroup, “Gender.” The gender subgroup is composed of Males and Females, each with their own column. Both gender groups are assigned a letter (Male=B, Female=C).

These two columns show how males’ attitudes compare to females’ attitudes. As shown in the chart, 69% of the full sample thinks things are headed in the right direction. Looking at the gender subgroup, 71% of women think things are headed in the right direction, compared to 66% of men.

**Statistically Significant Differences:** If a pair of cells has a difference which is statistically significant, the larger of the two cells is flagged with the letter of the opposite column. The test shows the difference in females’ attitudes about things being headed in the right direction is statistically significantly different

than those of males’, which is signified by a “B” (the letter given to Males) next to females’ results for “right direction.”

The footnote indicates the level of significance (sig=.05). This level of significance means that 5% of the time, the difference between how the two groups feel about the direction is due to random chance, while 95% of the time the difference is meaningful.

**Statement of Limitations:** Any sampling of opinions or attitudes is subject to a margin of error, which represents the difference between a sample of a given population and the total population. The margin of error is a statistic expressing the amount of random sampling error in a survey’s results and differs by sample size, as reflected in the table below.

**Margin of Error Based on Sample Size**

N=1200	N=1000	N=800	N=600	N=500	N=400	N=300	N=200	N=150	N=100	N=50
+/- 2.8%	+/- 3.1%	+/- 3.5%	+/- 4.0%	+/- 4.4%	+/- 4.9%	+/- 5.7%	+/- 6.9%	+/- 8.0%	+/- 9.8%	+/- 13.8%

Q1. Do you approve or disapprove of the job City of Portland and Multnomah County elected officials are doing to address homelessness in our community?

Q3. When it comes to homeless policy in the city of Portland, which comes closer to your opinion?

1. Local governments should require those camping on city sidewalks, streets, and public areas to sleep only in shelters or authorized camping areas.

Or

2. Local governments should allow people to live on public streets and sidewalks if they don't want to move.

Q4. Thinking about housing specifically, when it comes to homeless policy in the city of Portland, which comes closer to your opinion?

1. Local governments should prioritize funding more shelters and designated camping areas as a first step toward permanent housing. It's inhumane and dangerous to allow people to camp on streets and sidewalks.

Or

2. Even if it takes longer to move people off the streets, local governments should prioritize permanent housing. It is inhumane to force people to live where they do not want to and the only true solution to homelessness is to build more housing.

Q5. The Portland City Council is currently considering a five-part plan to address the city's homelessness crisis. One component of the plan is to ban unsanctioned camping on city sidewalks, streets, and public areas and only allow it in designated camping areas.

Given what you know, do you support, or oppose the city enforcing no camping laws and banning unsanctioned homeless encampments in public areas?

Q5. The Portland City Council is currently considering a five-part plan to address the city's homelessness crisis. One component of the plan is to ban unsanctioned camping on city sidewalks, streets, and public areas and only allow it in designated camping areas.

Given what you know, do you support, or oppose the city enforcing no camping laws and banning unsanctioned homeless encampments in public areas?

DHM Research: Portland Business Alliance - Portland Homelessness Policy Survey -- October 29 - November 1, 2022

Another component of the city council plan is for city government to create legally authorized camping areas across the city where Portlanders experiencing homelessness can move rather than remain in unauthorized camps on sidewalks, streets, and public areas. These designated camping areas would each serve hundreds of people and have the following services:

- On-site bathrooms, water and hygiene services and trash;
- Professionals to help people connect to social services and housing;
- On-site security

Q7. Given this information, do you support or oppose this proposal?

DHM Research: Portland Business Alliance - Portland Homelessness Policy Survey -- October 29 - November 1, 2022

In 2020, Portland area voters approved the largest homeless services measure, per capita, in the nation. This measure approved two new taxes that raise \$250 million a year to Clackamas, Multnomah, and Washington counties for homeless services with the promise of ending homelessness in Portland. This measure will expire in 2030 unless Portland area residents vote to re-approve it.

Q10. If it were on the ballot today, would you vote yes to re-authorize the taxes that fund the homeless services programs or vote no to discontinue the programs?

In 2020, Portland area voters approved the largest homeless services measure, per capita, in the nation. This measure approved two new taxes that raise \$250 million a year to Clackamas, Multnomah, and Washington counties for homeless services with the promise of ending homelessness in Portland. This measure will expire in 2030 unless Portland area residents vote to re-approve it.

Q10. If it were on the ballot today, would you vote yes to re-authorize the taxes that fund the homeless services programs or vote no to discontinue the programs?

DHM Research: Portland Business Alliance - Portland Homelessness Policy Survey -- October 29 - November 1, 2022

The Metro homeless services measure provides funding to Clackamas, Multnomah, and Washington counties based on total population rather than the total homeless population.

Q11. Agree/Disagree: Metro homeless services funds should be sent to counties based on the size of the homeless population rather than the total number of residents.
