# DHM Panel WA

April 13 – 18, 2023; n=500

## How to Read Crosstabs

Q1. All in all, do you think things are headed in the right direction or are things pretty much on the wrong track?

		Gender	
		Male	Female
<b>Total results</b> →		Total	
	Total	1371	722
		100%	100%
		(B)	(C)
	Right direction	943	549B
		69%	71%
	Wrong track	236	100
		17%	14%
	Don't know	192	79
		14%	13%
		-----	
		(sig=.05) (all_pairs) columns tested BC	

Annotations:

- Total results**: Points to the 'Total' row.
- Responses**: Points to the 'Right direction', 'Wrong track', and 'Don't know' rows.
- Subgroup results**: Points to the 'Male' and 'Female' columns.
- Significance test**: Points to the significance letters (B, C) in the 'Right direction' row.
- Indicates level of significance**: Points to the significance text at the bottom.

## How to Read Crosstables

In the example chart (left), rows represent the three possible response options to the question “All in all, do you think things are headed in the right direction, or are things pretty much on the wrong track?” The three response options are: “right direction,” “wrong track,” and “don’t know.” The amounts in each response category sum to the amount in the “total” row at the top of the table.

The first column, or banner, is the “Total” column. It reflects the overall results.

The next two columns reflect the results of a subgroup, “Gender.” The gender subgroup is composed of Males and Females, each with their own column.

Both gender groups are assigned a letter (Male=B, Female=C).

These two columns show how males’ attitudes compare to females’ attitudes. As shown in the chart, 69% of the full sample thinks things are headed in the right direction. Looking at the gender subgroup, 71% of women think things are headed in the right direction, compared to 66% of men.

## Statistically Significant Differences

If a pair of cells has a difference which is statistically significant, the larger of the two cells is flagged with the letter of the opposite column. The test shows the difference in females’ attitudes about things being headed in the right direction is statistically significantly different than those of males’, which is signified by a “B” (the letter given to Males) next to females’ results for “right direction.”

The footnote indicates the level of significance (sig=.05). This level of significance means that 5% of the time, the difference between how the two groups feel about the direction is due to random chance, while 95% of the time the difference is meaningful.

## Statement of Limitations

Any sampling of opinions or attitudes is subject to a margin of error, which represents the difference between a sample of a given population and the total population. The margin of error is a statistic expressing the amount of random sampling error in a survey's results and differs by sample size, as reflected in the table below.

## Margin of Error Based on Sample Size

N=1200	N=1000	N=800	N=600	N=500	N=400	N=300	N=200	N=150	N=100	N=50
+/- 2.8%	+/- 3.1%	+/- 3.5%	+/- 4.0%	+/- 4.4%	+/- 4.9%	+/- 5.7%	+/- 6.9%	+/- 8.0%	+/- 9.8%	+/- 13.8%

Q1. I describe my gender as:

In 2021 the Washington State Legislature passed a measure that toughened the requirements for a police officer to pursue a suspect. Currently, officers need probable cause to arrest someone before initiating a pursuit. Recently, the Washington State Senate passed a bill that would lower the threshold and allow law enforcement officers to initiate a chase if the officer has a reasonable suspicion that a person in a vehicle has committed or is committing a serious crime. The bill has not yet passed the Washington State House.

Q33. Do you support lowering the threshold to allow law enforcement officers to initiate a chase if the officer has reasonable suspicion that a person in a vehicle has committed or is committing a serious crime?

DHM Research - DHM Panel Washington Survey: April 13-18, 2023

In 2021 the Washington State Legislature passed a measure that toughened the requirements for a police officer to pursue a suspect. Currently, officers need probable cause to arrest someone before initiating a pursuit. Recently, the Washington State Senate passed a bill that would lower the threshold and allow law enforcement officers to initiate a chase if the officer has a reasonable suspicion that a person in a vehicle has committed or is committing a serious crime. The bill has not yet passed the Washington State House.

Q33. Do you support lowering the threshold to allow law enforcement officers to initiate a chase if the officer has reasonable suspicion that a person in a vehicle has committed or is committing a serious crime?

For many digital devices instructions and equipment required to make repairs on a broken device are not made available by the manufacturer. The Washington State Legislature is currently considering a bill that would require manufacturers of digital electronic equipment to make parts, tools, and documentation necessary for repairing equipment like laptops, tablets, and cell phones.

Q34. Do you support legislation that would require manufacturers to make parts, tools, and documentation necessary for repairing digital electronic equipment?

The US Department of Housing and Urban Development (HUD) defines "affordable housing" as housing that accounts for no more than 30% (or about one-third) of a household's income. This suggestion includes basic utilities like water, heat, and electricity.

Q35. Using this calculation, is your housing situation affordable? Your best guess is okay.

DHM Research - DHM Panel Washington Survey: April 13-18, 2023

The US Department of Housing and Urban Development (HUD) defines "affordable housing" as housing that accounts for no more than 30% (or about one-third) of a household's income. This suggestion includes basic utilities like water, heat, and electricity.

Q35. Using this calculation, is your housing situation affordable? Your best guess is okay.

Q60. Some AI technologies are able to have human-like conversations and develop human-like text (examples include ChatGPT, Bard AI, and ChatSonic). Other AI technologies can create art and music that are indistinguishable from human made art and music. Do you believe it is ethical for people or companies to use AI technologies that replace humans for financial gain?
