

Introduction and Methodology

From March 31-April 8, 2025, DHM Research conducted an online survey of Oregon residents. The purpose of the survey was to assess overall mood and economic outlook as well as residents' opinions on business, healthcare, and key issues. This survey also explored residents' attitudes toward American values and gauged residents' impressions of prominent figures and major businesses.

Research Methodology

The online survey consisted of N=500 Oregon residents and took approximately 15 minutes to complete. This is a sufficient sample size to assess Oregonian's opinions generally and to review findings by multiple subgroups.

Respondents were members of a professionally maintained online panel. A variety of quality control measures were employed, including questionnaire pre-testing and validation. To ensure a representative sample, demographic quotas were set and data were weighted by age, gender, region, political party, education, and income level.

Statement of Limitations

Any sampling of opinions or attitudes is subject to a margin of error. The margin of error is a standard statistical calculation that represents differences between the sample and total population at a confidence interval, or probability, calculated to be 95%. This means that there is a 95% probability that the sample taken for this study would fall within the stated margin of error if compared with the results achieved from surveying the entire population. The margin of error for this survey is +/- 4.4%.

DHM Research Background

DHM Research has been providing opinion research and consultation throughout the Pacific Northwest and other regions of the United States for over 40 years. The firm is nonpartisan and independent and specializes in research projects to support public policy making.

DHM Panel Oregon Statewide March 31 - April 8, 2025 N=500; margin of error +/- 4.4% April 2025

Demographics

1. In what county do you live?

[Autofill area as]:

| Response category | n=500 |
|-------------------|-------|
| Tri-county | 44% |
| Willamette Valley | 27% |
| Rest of state | 29% |

2. How do you describe your gender?

| Response category | n=500 |
|---|-------|
| Man | 49% |
| Woman | 49% |
| Non-binary or gender non- conforming | 1% |
